

Make a Paper Airplane!

1. Fold paper in half the long way and reopen.

2. Fold the top two corners into the center spine of the paper.

3. Refold lengthwise and rotate the paper to lay on the table like this:

4. Fold the top left corner down to lay parallel to the bottom spine.
Repeat this step on the other side.

5. Turn the paper over and repeat the last two steps.
Your airplane should look like this!

Experiment!

How far can you make the airplane fly?
You can measure the distance with
a piece of string, with your steps,
or with a measuring tape.
